

AIRTRACK P2

The AirTrack P2 is the middle thickness mat. It's easy on the body at low pressures, but comes close to a spring floor at higher pressures. The mat is 2 meter wide and pairs well with similarly thick 20 cm landing mats, creating a level stepping surface off or around the AirTrack P2 mat.

Our P2 products have a height of 20 cm and therefore gives more bounce than the AirFloor, but less bounce than the P3 models. The P2 is therefore not only suitable for recreational groups, but also for higher level gymnasts.

In combination with add-ons such as the AirIncline or our renewed AirBox system, training possibilities will be endless!
