

WARM-AIR-SHOWER

PURE WELLNESS FOR YOUR HANDS, BODY AND HAIR – REZ WARM-AIR DRYERS

After hard physical work or sporting activities there is nothing better than a fresh, prickling shower. But this is only the beginning: Your relaxing wellness programme wouldn't be complete without a warm breeze that dries your hands, hair and body in an attractive setting with comfortable equipment of high quality.

The Rez product range has been designed to fulfil your individual needs for physical relaxation. In addition, it provides planners and architects with a lot of possibilities for the attractive and sensible design of wet zones.

Our product range offers maximal comfort in high quality and sets international standards on the basis of long-standing development, cooperation with customers as well as consistent implementation of user requirements. Today Rez manufactures the world's most robust warm-air showers and hair dryers. There is no doubt: Rez products provide wellness for your hands, body and hair through technical sophistication and great variety.

WARM-AIR SHOWERS REZ VENDAVAL – ESTABLISHED IN PRIVATE HOMES AND PUBLIC PLACES

Swimming pools, fitness centers, schools, hotels and restaurants, nursing centers are only some examples where our products are used. Thanks to an almost infinite number of colourful designs Vendaval warm-air showers set clear visual signals, which either harmonise or deliberately stand in contrast with the surrounding architecture. Our product range extends from fixed devices to height adjustable devices with crystal mirrors.

Manufactured with the same precision, our reliable hand dryers complete our Rez product line optimally. Our products satisfy the need for hygiene, minimize operational costs and are environmentally friendly.

WARM-AIR SHOWERS

REZ VENDAVAL

Vendaval devices are equipped with high-power ventilators to ensure dependable long-term usage. The state-of-the-art, high-frequency radar technology with precisely set coverage allows problem-free positioning. The warm-air showers come in robust low-maintenance plastic casings and are available in numerous colour combinations with or without height-adjustment. The height adjustable devices can be equipped with a crystal mirror that allows you to do your hair during drying. By the way! The warm-air shower «Vendaval» is the only real vandalism resistant device in its class.

There are also considerable advantages for operators: There are no openings for sensors or switches, which prevents damaging and minimises maintenance. Concerning maintenance costs: Repairs don't even take 5 minutes. Just change the part and that's it.

For more current information, tips and planning help go to www.rez-ag.ch

HANDSFREE, HIGH FREQUENCY RADAR TECHNOLOGY WITH TIMER

Developed by Rez this novelty revolutionises the use of warm-air showers. A great benefit to users is the convenient timer. As soon as the radar detects a movement in its precisely set coverage area (0-20 cm) the device turns on and runs for 2.5 minutes. As long as the radar detects movement the device keeps operating its 2.5 minutes cycles. This way the annoying turning on and off during drying is avoided. And it's handy for children: They only have to pull the device to their height. No pressing buttons, just standing under the device and drying their hair, that's all.

AVANTAGES OF THE REZ WARM-AIR SHOWERS

- _for long-term, tough, daily use
- _guaranteed durability
- _vandalism resistant
- _height adjustment is standard in metal
- _minimal maintenance
- _conforms to highest safety requirements
- _handsfree, high-frequency radar with timer
