gantner ⁄V
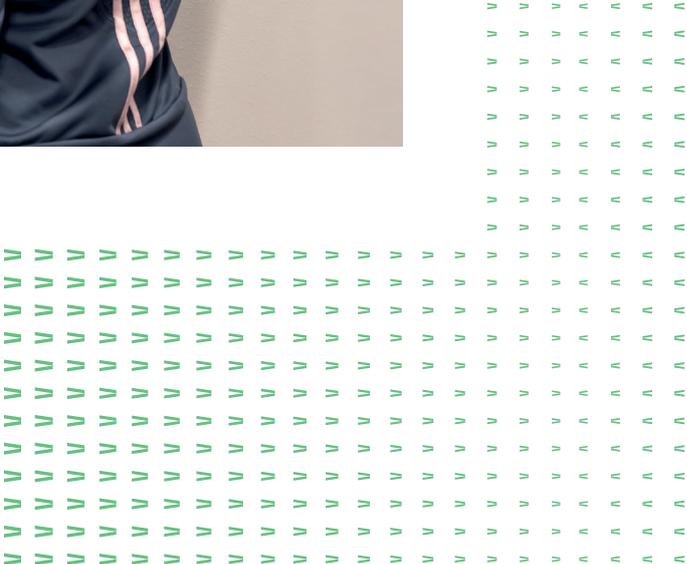

ADDITIONAL DOORS. DIGITALIZED.

GT7 Lite

Compact, efficient, versatile: The GT7 Lite expands the GT7 family with a flexible access terminal designed to digitalize additional doors and application areas. Quickly installed via PoE, it's the ideal smart add-on for existing systems already managed in G7 Connect.

SALTO ⁄V ECOSYSTEM

Key Benefits

> Easily connect and centrally manage additional doors and turnstiles.

> Installation via a single network cable – PoE is all you need.

> Flexible use through the G7 app concept (Access & Info App) and G7 Cloud integration.

> Wide RFID/NFC compatibility, including Gantner SmartPass. (Availability depends on region/certification)

> Compact terminal in the design of the GT7 product family.

> Available with or without a 3.5" touch display for maximum flexibility.

System Architecture

01
Mount the GT7 Lite terminal on a door or turnstile.

02
Connect to power and network via PoE switch.

03
G7 Apps

Install the required G7 apps.

04
G7 Connect

Manage settings in G7 Connect.
