

340 Gymleco Leg Extension

300 series, Selectorized machines

Smart and flexible construction where the weight magazine serves as protection for the kick movement.

Correct positioning of the joint point causes the foot roll to follow the anatomical movement curve, which gives an absolutely soft and even load throughout the movement.

Insulates the front of the thigh and is gentle on the joints. Low starting weight makes it suitable for rehabilitation. Ability to adjust the backrest and footrest while sitting in the machine.

- Standard frame color: Black
- Standard cushion color: Black / Red
- Stepless adjustment of backrest and foot cushion
- Weight block: 100 kg
- Larger weight block (optional)
- Belt (optional)
- Long movement

Lenght	Width	Height	Weight
95 cm	99 cm	162 cm	202 kg

No maintenance needs.
