

Anchor Set instruction for 11.40.30.00

1. Firstly insert the anchor (3) into the ground by 'screwing' it into the ground. You can stick a screwdriver through the round end of the anchor, to make it easier to screw the anchor into the ground.
 2. Secondly attach one long Belt (4) to another short Belt (4), but not closed yet.
 3. Then tie the top tube with socket (1) down to the Leg Brace (2) and make the other end of the Belt (4) through the hole of the anchor (3);
 4. Finally attach the end of the Belt (4) to another Belt (4). please refer to the picture 1
- Note: in order to adjust length of the belt, you can tighten the belt as shown in picture 2.
